Background

Chapter 8 of the Congestion Management Process (CMP) specifies the transportation system performance measures by which congestion on the Lake-Sumter Metropolitan Planning Organization (MPO) roadway network is to be identified, tracked, and monitored. The System Performance Monitoring Plan identified six categories of performance measure:

- Level of Service,
- Safety,
- Transit,
- Bicycle and Pedestrian,
- Carpooling, and
- Truck Traffic.

A Systems Performance Evaluation was prepared in 2019. This report summarizes the vehicular level of service evaluations for the CMP Network as identified within the CMP Policies and Procedures based on year 2020 traffic data. An evaluation was performed for existing year 2020 and future year 2025 to coincide with the most recent five-year improvement programs.

The CMP Network was expanded within Sumter County based on known regional roadway network expansions, as provided by Sumter County.

This represents the second year of the Systems Performance Evaluation State of the System Report, but is focused solely on vehicular level of service.

Introduction

This memorandum is provided to summarize the changes to the LSMPO CMP Systems Evaluation resulting from the year 2020 (year two) update. Updates were made to include the latest available traffic data (year 2020) and to compare traffic volumes to the updated capacity thresholds outlined in the Florida Department of Transportation (FDOT) *Quality/Level of Service (Q/LOS) Handbook* published in June 2020. In addition, the latest FDOT Work Program, LSMPO Transportation Improvement Program (TIP), Lake County Transportation Construction Program (TCP), and Sumter County Capital Improvement Program (CIP) were reviewed to ensure that funded capacity improvements were considered in the evaluation of future roadway conditions.

The findings of the Systems Evaluation for 2020 and 2025 conditions were mostly consistent with those of 2019 and 2024. In some cases, however, the updated traffic data from 2020 or the updated generalized level of service capacities from the FDOT *Q/LOS Handbook* resulted in a change to the congestion ratings identified in the prior analysis. Note also that historical growth rates applied to forecast future year 2025 volumes are based on the most recent five (5) years of historical traffic data, so new 2020 data points resulting in an increase or decrease to the historical growth rate also factored into changes in congestion ratings. Growth rates are determined solely based on historical traffic trends; individual planned developments within Lake and Sumter Counties are not accounted for in the applied growth rates.

FDOT Quality/Level of Service Capacity Updates

In June 2020, FDOT published an update to the *Q/LOS Handbook* that resulted in minor changes to the generalized service capacities. Roadway segment characteristics that affect service capacity include number of lanes, median types, posted speed limits, and area types (urban or rural).

The Q/LOS is utilized in the Systems Evaluation to determine V/C ratios and Level of Service (LOS) for roadway segments within the Lake and Sumter County networks. An update based on the most recently published service volumes from FDOT were implemented in all calculations throughout Lake and Sumter Counties.

In some cases, the adjustment in service capacity resulted in a change in reported congestion levels on the roadways. **Table 1** and **Table 2** note where the updated capacity thresholds resulted in a change in results for a given roadway segment.

Volume-to-Capacity Ratio

Vehicular volume-to-capacity (V/C) ratios were calculated for individual roadway segments within the CMP roadway network. The 'capacity' for the purpose of this analysis was taken to be the LOS E service volume plus 8%. This threshold is more representative of the physical capacity of a given roadway segment than the adopted LOS service capacity.

Congested Corridors

Roadway corridors within the CMP transportation network were categorized as not congested, approaching congestion, congested, or extremely congested based on the following criteria which is outlined in the CMP Policies and Procedures Manual:

- *Not Congested* – Operating at an acceptable LOS
- *Approaching Congestion* – Operating between 90% and 100% of LOS Standard
- *Congested* – Exceeding 100% of LOS Standard but less than 108% of LOS E
- *Extremely Congested* – Exceeding 108% of LOS E (physical capacity)

There are exhibits located within the **Appendix** that illustrate the levels of congestion on each roadway within the CMP network for Lake and Sumter County.

Funded Capacity Improvement Projects

The following capacity improvements with funding identified by future year 2025 were included in the 2020 update beyond those that were included in the 2019 analysis:

- Widen Florida's Turnpike from 4 to 8 lanes, Minneola Interchange to US 27 (FDOT 4357861)
- Widen Florida's Turnpike from 4 to 8 lanes, Orange C/L to Minneola Interchange (FDOT 4357851)
- Widen SR 50 from 2 to 4 lanes, Hernando C/L to west of CR 757 (FDOT 4358593)
- Widen CR 466A from 2 to 4 lanes, Timbertop Lane to Poinsettia Ave (Lake 430253)

New Roadways

Several new roadways are planned and funded for construction within the CMP network by year 2025. These roadways are included in the Year 2025 Number of Lanes maps, but they are not included in V/C, LOS, or Congestion Rating maps since these roadways do not yet have traffic data collected.

- Construct CR 455 as a new 2 lane roadway from Hartwood Marsh Rd to Lost Lake Rd (Lake NRD16008-CD2)
- Construct CR 455 as a new 2 lane roadway from Lost Lake Rd to Hartle Rd (Lake NRD161009-CD2)
- Construct Citrus Grove Rd as a new 2 lane roadway from Turnpike to Blackstill Lake Rd (Lake NRD17050-CD2)
- Construct Buena Vista Blvd Extension as a new 4 lane roadway from SR 44 to Meggison Road (Sumter CIP)
- Construct Meggison Road as a new 4 lane roadway from SR 44 to Bexley Trail (Sumter County)
- Construct Meggison Road as a new 2 lane roadway from Bexley Trail to Sumter County Line (Sumter County)
- Construct Morse Blvd Extension as a new 4 lane roadway from Morse Blvd/Warm Springs Avenue to Meggison Road (Sumter County)
- Construct Corbin Trail as a new 2 lane roadway from Warm Springs Avenue to Bexley Trail (Sumter County)
- Construct Corbin Trail as a new 4 lane roadway from Bexley Trail to Road 2 (Sumter County)
- Construct Central Parkway as a new 4 lane roadway from C-470 to Lake County Line (Sumter County)
- Construct Road A as a new 4 lane roadway from Central Parkway to Bexley Trail (Sumter County)
- Construct Marsh Bend Trail Extension as a new 2 lane roadway from Central Parkway to Corbin Trail (Sumter County)

Lake County Changes in Congestion

Updated 2020 traffic count information was provided for approximately half of the Lake County traffic count locations. Thirteen of the traffic counts were collected in April or later, after which time local stay-at-home orders may have impacted the number of vehicles regularly traveling on the Lake County roadway network.

Year 2020 traffic volumes were assumed to be consistent with those collected in 2019 for roadway segments where 2020 data was not collected before the onset of the COVID-19 pandemic. In these instances, the 2019 traffic data was utilized for the updated 2020 traffic data. **Table 1** lists the roadway segments in Lake County where 2020 traffic counts were taken after March and were therefore replaced with 2019 counts in the updated analyses.

Table 1: Lake County Traffic Counts Collected after March 2020

2780	613	ROUND LAKE ROAD	WOLF BRANCH ROAD	SR 46	Tuesday, 6/23/20

Fifty-nine Lake County roadway segments were found to exhibit a different congestion rating with the inclusion of 2020 data than they exhibited with data through 2019. For most of these segments, a relatively normal increase or decrease in peak hour traffic volumes resulted in a volume-to-capacity (V/C) ratio that crossed one of the thresholds for determining congestion rating (i.e. V/C ratio increased from 0.88 – Not Congested to 0.92 – Approaching Adopted LOS Threshold). For some, the inclusion of 2020 traffic data increased or lowered the historical growth rate on a given roadway segment, thus increasing or reducing the future (2025) traffic volume projections to above or below one of the thresholds for determining congestion rating.

Table 2 summarizes the Lake County roadway segments for which the congestion rating was found to change between the 2019 analysis and the updated 2020 analysis and notes what factored into that change.

Table 2: Lake County Roadway Evaluation – Changes from 2019 Data and 2020 Data

Sumter County Changes in Congestion

Updated 2020 traffic count information was provided for all of the Sumter County traffic count locations. All data was collected in January or February, prior to the onset of the COVID-19 pandemic and related stay-at-home orders.

Nineteen Sumter County roadway segments were found to exhibit a different congestion rating with the inclusion of 2020 traffic data than they exhibited with traffic data through 2019. For most of these segments, a relatively normal increase or decrease in peak hour traffic volumes resulted in a V/C ratio that crossed one of the thresholds for determining congestion rating (i.e. V/C ratio increased from 0.88 – Not Congested to 0.92 – Approaching Adopted LOS Threshold). For some, the inclusion of 2020 traffic data increased or lowered the historical growth rate on a given segment, thus increasing or reducing the future (2025) traffic volume projections to above or below one of the thresholds for determining congestion rating.

The 2020 update to FDOT's Q/LOS Handbook increased the service volumes for some freeway facilities. For some segments of I-75 this update resulted in reduced congestion ratings from the updated analysis.

Table 3 summarizes the Sumter County roadway segments for which the congestion rating was found to change between the 2019 analysis and the updated 2020 analysis and notes what factored into that change.

Table 3: Sumter County Roadway Evaluation – Changes from 2019 Data and 2020 Data

Summary

This memorandum summarizes the updates to the LSMPO CMP Systems Evaluation maps and tables based on the latest available traffic data, updated transportation improvement programs, and changes to the FDOT Q/LOS Handbook service capacities. The full CMP database tables and map packages are provided as attachments.

Tables included herein detail each of the segments within Lake and Sumter Counties for which the congestion rating has been updated since the previous analysis was completed. Changes were primarily attributed to normal increases or decreases in traffic volumes on individual segments. However, on some freeway segments in Lake County the changes are attributed to updates to the FDOT Q/LOS Handbook generalized service volume tables, which increased capacity thresholds on freeway facilities.
