

The Lake-Sumter MPO (LSMPO) **2050 Long Range Transportation Plan (LRTP)** is a planning document required by federal and state law that is updated every 5 years. This document reflects the transportation goals, objectives, and priorities of a region.

Elements of the LSMPO **2050 LRTP** include:

- Goals & Objectives
- Financial Resources
- Freight & Goods Model Element
- Transit Development Plan (TDP)
- Complete Streets
- Travel Demand Model
- Safety
- Public Involvement Plan
- Needs Assessment
- Cost Feasible Plan
- Active Transportation
- TSM&O

Livability

Preservation

Implementation

What do MPOs Do?

Metropolitan Planning Organizations (MPOs) develop long- and short-range transportation plans and documents for all travel modes, including roads, transit, sidewalks, bicycles, and more. These documents are informed by data, modeling, and the public. MPOs are a **regional coordinator** for local governments to align on project priorities.

2050 LRTP Plan Adoption

All components and technical memos of the LRTP will be combined into a final report that will be reviewed and adopted by the LSMPO Governing Board. The final report will include a checklist for review by federal and state government agencies (the Federal Highway Administration (FHWA) and the Florida Department of Transportation (FDOT) respectively).

The Lake-Sumter MPO (LSMPO) **2050 Long Range Transportation Plan (LRTP)** is a planning document required by federal and state law that is updated every 5 years. This document reflects the transportation goals, objectives, and priorities of a region.

2050 LRTP Webportal Hub Site

The LSMPO **2050 LRTP Webportal Hub Site** was developed as a tool to review existing conditions, different data sets, the previous 2045 LRTP Needs, as well as the new 2050 LRTP Needs Assessment. This 2050 Needs Assessment was developed through the combination of previous unfunded 2045 Needs, the most-recently adopted List of Project Priorities (LOPP), and public feedback.
