Interactive Tools

More than 85 percent of the data used by local agencies in their decision-making is geographic in nature. CFGIS Interactive Tools will take advantage of several regional interactive mapping tools. The public can customize the format and scale appropriate to their needs.

Step 1: Go to <http://www.cfgis.org> and click on **Interactive Tools**

Interactive Tools

Provides access to basic information regarding transportation projects programmed over a five-year period that are funded with state and federal transportation dollars in nine Central Florida counties. Related documents such as DRI summaries, comments, annual reports, amendments and others may also be downloaded as PDFs.

- DRI Tool
- Work Program
- ETDM Project Diary Tool**
- Traffic Data

Step 2: Select ETDM Project Diary Tool

Follow these steps to give the Project Diary a trial run.

If you have questions, contacts are on the other side of this flyer.

ETDM Project Diary

County Name	Projects
DISTRICTWIDE	3
BREVARD	6
FLAGLER	5
LAKE	8
MARION	5
ORANGE	5
OSCEOLA	5
POLK	0
SEMINOLE	10
SUMTER	2
VOLUSIA	11

Step 3: Click on a county (for the Pilot, choose Lake)

ETDM Project Diary

Step 4: Click on a project (SR19/CR48/CR561)

Choose from the list of projects to view documents associated with that project.

Project Name	From	To	ETDM #	FM #	Documents
DeletedCR44B	441	44			11
S. LAKE TRAIL	CITY OF CLERMONT LINE	SUMTER CO LINE			0
SR19	CR48	CR561			6
SR19/CR48/CR561	Lake County	Lake County	10500		14
SR44	Haselton	CR44B			15
SR50	SR33	Bloxam Ave			5

Step 9: You will see "Comment posted." on the page to show that the comment was received. The online view of your post will have a delay, as the moderator screens for inappropriate content. The moderator is not editing any "real" comments. Only obscenities and the like will be thrown out.

Overview of the SR19/CRs 561/4 Pilot Project By Lake-Sumter MPO & FDOT

and

The ETDM Project Diary on CFGIS

District Five

About the Pilot Project

Please find project information on SR 19, CR 561, and CR 48 on FDOT District 5's "Project Diary" located on the Central Florida GIS website. You can view project data, make comments on potential projects or attached maps and documents, and even link up to the ETDM (Efficient Transportation Decision Making Process) Public Website. For a better understanding of why this pilot project was initiated, you may want to review the PowerPoint presentation provided in "other" documents on the site under this project name. Instructions on navigating to these projects are included on the back of this flyer.

What is ETDM?

Florida's Efficient Transportation Decision Making (ETDM) Process is a new way of accomplishing transportation planning and project development for major capacity improvement projects. The ETDM Process enables agencies and the public to provide early input to the Florida Department of Transportation (FDOT) and Metropolitan Planning organizations (MPOs) about potential effects of proposed transportation projects. The goal of ETDM is to make transportation decisions more quickly without sacrificing the quality of the human and natural environments.

For more general information on the ETDM process and to later view Agency comments on this or other projects, please visit the ETDM Public Website at <http://etdmpub.flas-etat.org>
