

TRANSPORTATION IMPROVEMENT PROGRAM

FISCAL YEARS 2004/05-2008/09

ADOPTED MAY 26, 2004

Prepared by the
Lake-Sumter Metropolitan Planning Organization
123 N. Sinclair Avenue
Tavares, FL 32778

This report was financed in part by the Federal Highway Administration, Federal Transit Administration, Florida Department of Transportation and participating local governments.

**LAKE-SUMTER METROPOLITAN PLANNING ORGANIZATION
MEMBERS**

Commissioner Debbie Stivender, Chairman
Lake County Board of County Commissioners

Commissioner Ben Perry, Vice-Chairman
City of Leesburg

Commissioner Jennifer Hill
Lake County Board of County Commissioners

Commissioner Robert Pool
Lake County Board of County Commissioners

Commissioner Catherine Hanson
Lake County Board of County Commissioners

Commissioner Welton Cadwell
Lake County Board of County Commissioners

Commissioner Jim Roberts
Sumter County Board of County Commissioners

Councilmember Frank Caputo
City of Clermont

Vice Mayor/Commissioner Frank Royce
City of Eustis

Councilmember Ty Miller
Town of Lady Lake

Mayor Randall Moye, Jr.
City of Minneola

Mayor James Yatsuk
City of Mount Dora

Vice Mayor Ted Wicks
City of Tavares

MPO Member
City of Astatula

Councilmember Sharon Kelly

LAKE COUNTY TRANSPORTATION CONSTRUCTION PROGRAM 2004-2008

INTRODUCTION

To carry out the transportation planning process required of the Lake-Sumter Metropolitan Planning Organization, a transportation improvement program (TIP) must be developed for the designated boundary of the Metropolitan Planning Organization (MPO). The designated boundary is shown in the map on this page. In accordance with Title 23 United States Code, the TIP shall:

- Include a priority list of projects to be carried out in the first three years (expanded to 5 years by FDOT);
- Be financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenue sources;
- Include all transportation projects proposed for funding under Title 23, U.S.C. including pedestrian walkways, bicycle facilities and transportation enhancement projects; and
- For monitoring progress, identify the criteria and process for prioritizing implementation of transportation plan elements, including intermodal tradeoffs.

The TIP may be modified at any time consistent with procedures established in Title 23 for its development and approval. After approval by the MPO and the Governor, the TIP shall be included without modification into the State TIP (STIP). The first year of the TIP shall constitute an “agreed to” list of projects for project selection purposes from which the implementing agency may proceed with projects.

PROJECT SELECTION PROCESS

The 2004/05-2008/09 Transportation Improvement Program (TIP) is based on the 2020 Long Range Transportation Plan (LRTP) for Lake County and the annual Project Priority Lists developed by Lake and Sumter Counties and submitted to the Florida Department of Transportation (FDOT) for developing its tentative 5-year work program. For information purposes, the Lake County Public Works 5-year Transportation Construction Program is included in a separate section. The Lake-Sumter Metropolitan Planning Organization (LSMPO) will be responsible for updating the 2020 Long Range Transportation Plan to the year 2025. Once the 2025 Plan is adopted, future TIP's will be developed from the 2025 Plan, local government comprehensive plans and other projects identified in accordance with the standard project selection process outlined below. When a project within the MPO planning area has been identified as a potential project, the MPO requests that FDOT and the Federal Highway Administration (FHWA) actively pursue appropriate funding.

The FDOT shall give priority to those projects that are:

1. Designed to maximize safe and efficient travel;
2. Identified in approved local government comprehensive plans to receive local matching funds in accordance with the provisions of Section 335.20, F.S. or to be funded pursuant to the provisions of Section 339.12, F.S.;
3. Within transportation corridors protected by local government action;
4. Used in the operation of, or in conjunction with, public transportation facilities; and
5. Located within the boundaries of a local government which has made a responsible effort to fund improvements needed to accommodate local traffic.

PRIORITY SELECTION PROCESS

The Transportation Improvement Program is derived from the existing 2020 Long-Range Transportation Plan. The MPO will update this Plan to a year 2025 Long Range Transportation Plan using the priority process described here. The LRTP will have two components, the *Needs Plan* and the *Cost Feasible Plan*. The Needs Plan will identify deficient roadway corridors based upon population, employment and land use projections. The Cost Feasible Plan will prioritize these deficient corridors into four categories based upon a proposed improvement's overall benefit to the highway network as well as available revenues. The Cost Feasible Plan will list the critical road projects that are financially feasible into generalized recommended priorities and eliminate any project that is socially, economically or environmentally undesirable.

MPO staff will evaluate all eligible priority projects based on FDOT and MPO policies. This evaluation will include an objective and technical review of each priority based on a road's level-of-service, physical condition, facility type, benefit to the highway network, construction cost and scheduled work program phase. In addition to the process above, the MPO's advisory committees will consider the following factors in the final determination:

- 1) The project supports the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity and efficiency;
- 2) Increases the safety and security of the transportation system for motorized and non-motorized users;
- 3) Increases the accessibility and mobility options available to people and freight;
- 4) Protects and enhances the environment, promotes energy conservation and improves the quality of life;
- 5) Enhances the integration and connectivity of the transportation system, across and between modes, for people and freight;
- 6) Promotes efficient system management and operation; and
- 7) Emphasizes the preservation of the existing transportation system.

After the Citizens Advisory Committee and the Technical Advisory Committee prepare their priority recommendations, the MPO Board will review the recommendations for the final MPO adopted Federal and State Priorities. This MPO recommended priority list will then be transmitted to FDOT for the development of the next FDOT Tentative Work Program for Lake and Sumter Counties.

AMENDMENTS TO THE TIP

The MPO may unilaterally add, remove or reschedule any locally funded TIP project that is not a level of service requirement. For all other projects, the federally approved TIP can be modified at any time when there is a joint agreement between the MPO and the FDOT. Modification of a current TIP may also require amendment to the FDOT's Adopted Work Program based on projects that require mid-year rescheduling.

Upon MPO endorsement of the TIP modification, a copy of the modification is sent to the FDOT district office and the Florida Department of Community Affairs (DCA) for consistency review purposes. Therefore, the MPO may not remove or reschedule any local City, County or City/County funded level of service project from a current TIP to a subsequent TIP without an amendment. Action by the FDOT District Secretary is required for all joint TIP amendments that involve projects in the Department's Adopted Work Program that are to be advanced, deleted or rescheduled pursuant to the following provisions of Section 339.135 (7) paragraph c, F.S.:

- a) Any amendment that deletes any project or project phase;
- b) Any amendment that adds a project estimated to cost over \$150,000;
- c) Any amendment that advances or defers to another fiscal year, a right-of-way phase, a construction phase or a public transportation project phase estimated to cost over \$500,000, except an amendment advancing or deferring a phase for a period of 90 days or less; or
- d) Any amendment that advances or defers to another fiscal year, any preliminary engineering phase or design phase estimated to cost over \$150,000, except an amendment advancing or deferring a phase for a period of 90 days or less.
